NEWS RELEASE

Bird and Mosquitoes Test Positive for West Nile Virus

A positive mosquito sample for West Nile Virus (WNV) was found on August 30, 2005 on Sharon Drive in Bryan. Also, a blue jay positive for WNV was collected on September 6, 2005 on Arbor Drive in Bryan. Mosquito control personnel for the City of Bryan have been notified, and residents in both areas will be notified by phone with the automated Dialogics system.

Residents are asked to continue to keep their defenses up against mosquitoes, as 26 sites in both Bryan and College Station have had WNV positive mosquitoes and/or birds.

For more information, contact Sara Mendez at 979-361-4440.
